

# Professional HS&E Services

## Full-Service Health, Safety and Environmental Consulting Firm

HSEC Services provide a diverse range of complementary services aimed at achieving sustainable and effective business outcomes for our clients and the community. Our goal is to deliver excellence in professional consulting services, project, training, technical and maintenance support services to our clients globally.

Our consultants and advisors are recognised as leading practitioners in occupational health, safety, environmental, contractor management, and personnel learning and development strategies.

### We can also support your business with:

#### Regulatory Compliance:

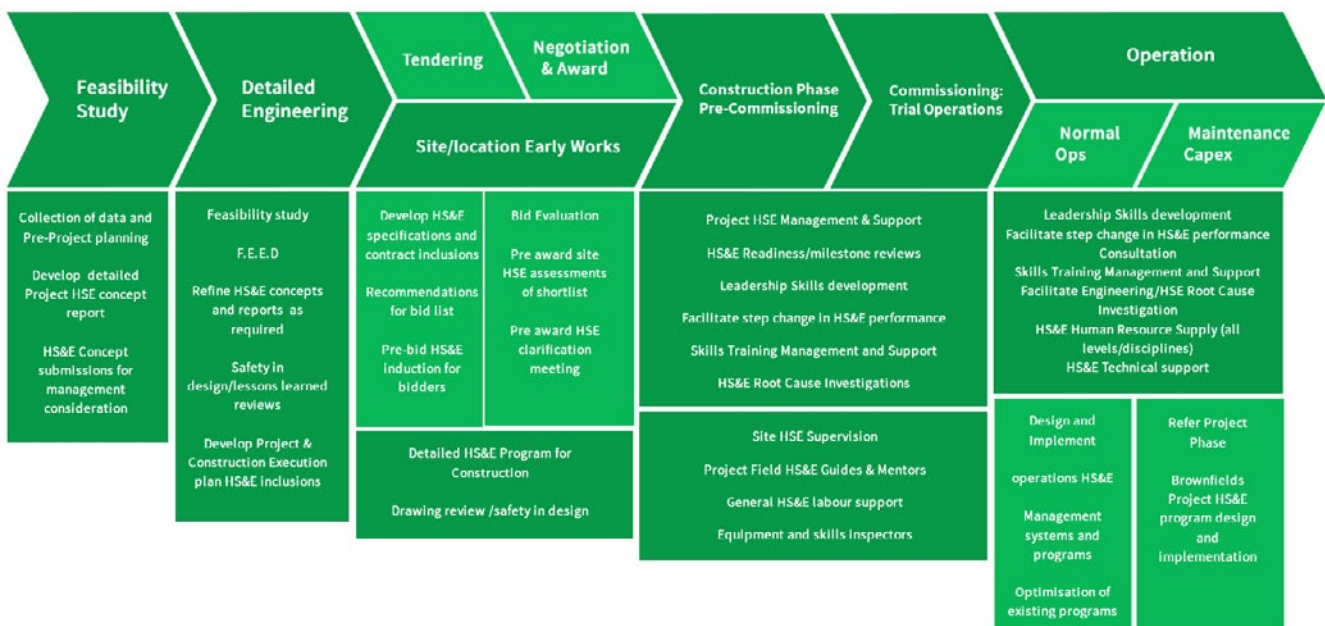

- Onsite audits;
- Onsite assistance with governmental inspections; and
- Expert witness.

#### HS&E Management System Support:

- Design/review HS&E Plans, Procedures and systems;
- Cold Eyes reviews; and
- Implementation and delivery of required elements to the workplace.

#### Capital and Majors Projects

The graphic below indicates services we would typically provide advice and/or support for.

### **Specific worksite/Jobsite HS&E targeted audits or Inspections**

- Supervisor effectiveness
- Hazard Management & Control
- Fall protection
- Emergency preparedness and action plans
- Lockout/tagout
- Hearing conservation
- Confined space
- Hazardous substance management

### **Professional Staffing**

Training delivered by professionals can increase productive workplace safety, decrease costs and ensure regulatory compliance. The experts at HSEC Services offer a wide range of instructor-led training courses to meet your unique needs.

### **Customized, Instructor-Led Courses**

We offer customised classes and training, at our location or onsite, led by our certified instructors. Customisation helps ensure that the context is appropriate for your specific site.

We provide student manuals to encourage student participation and instructors who bring a wealth of experience to introduce real-life example of how training relates to everyday duties.

Our classes include field exercises, case studies, labs and application-based discussions (in appropriate languages) and activities to help students relate what they learn back to their work environment and apply it to their job.

Our goal is to grab and hold the attention of trainees in a fun, educational and interactive environment.

---

See what a difference HSEC Services can make to your safety, operational and financial performance.

Our vision is to be a service provider where our clients identify that we add great value as a result of our highly professional services and support, and the local community identify HSEC Services as a good employer of their children.
